Kung Fu – 'kung' meaning 'energy' and 'fu' meaning 'time' – is a Chinese martial art whose recorded history dates back to around 525 CE, during the Liang dynasty. The man credited with introducing martial arts to China is said to be an Indian monk known as Bodhidharma.

Many people have a misconception that Chinese Kung Fu is about fighting and killing. It is actually based on Chinese philosophy and is about improving wisdom and intelligence. Taoist philosophy is deeply rooted in and had a profound influence on the culture of Chinese martial arts.

The five traditional animal styles of Shaolin Kung Fu are the dragon, the snake, the tiger, the leopard and the crane. The union of the five animal forms clearly displayed the efficacy of both hard and soft movements, of both internal and external energy - this form of Chinese martial arts was known as Shaolin Kung Fu, named after the temple in which it was developed.

Questions:

- Which country does the martial art Kung Fu belong to?
- What is the meaning of the term "Kung Fu"?

His parents threatened to let him starve. He was very hungry. He searched for food on the ledge. He managed to find a dried piece of Mackerel's tail and the dried pieces of eggshell to eat. He saw his mother tearing a fish. He begged his mother sadly for food. She wanted to motivate him to fly. So she flew across to him with a fish in her beak. She halted near his reach. But he couldn't reach the food as it was out of his reach. Maddened by hunger, he dived at the fish flapping his wings. Initially he lost his balance and was frightened. To save his life he had to flap his wings. As he flapped, he began to fly. Thus he learnt to fly after a long struggle.

Watson rushed to Smith's house and persuaded him by telling the condition of Holmes. His concern for Holmes convinced Smith to believe that his plan had worked out. So he agreed to come. As instructed by Holmes, Watson had returned to Holmes' house before Smith arrived and hid in the next room. When Smith came there, he thought that Holmes was dying. So he confessed that he himself had killed Victor Savage. In the same way he had infected Holmes too. Holmes asked him to turn up the gas light. It was the signal for inspector Morton to get into Holmes' room. He arrested Smith. Then Holmes asked sorry to Watson for insulting and underestimating his capability. He told Watson the reason why he pretended to be ill. This was how Watson helped Homes to trap and arrest Smith.

32. The narrator and Aditya visited Aditya's village after 29 years. After visiting the school, they went to Nagen uncle's tea shop. They found a customer sitting at a corner table. When Nagen uncle asked him to go home, he suddenly stood up. Raising his lean arm, he began to recite Tagore's poem 'Panraksha' with his dilated eyes. The narrator also noticed a sudden change in Aditya's expression. Aditya could recognise him as Sanyal. Both Aditya and Sanyal were classmates. Sanyal always stood first in the class. He won the medal for reciting Tagore's poem, 'Panraksha'. Aditya was jealous of him. He got the medal from Sanyal to show to his father. But he never returned it. When Sanyal demanded his medal, Aditya said that he had missed it. His answer annoyed Sanyal. But Aditya actually hid it in the attic. Remembering all these, he felt guilty and seemed overwrought. After inquiring Nagen uncle about Sanyal, Aditya took the narrator to his ancestral house. He took the medal from the attic and went to jeweller's shop, weighed it and came to Sanyal's house. When Sanyal accused him, he listened to him patiently admitting his mistake. He told Sanyal that he was right in his anger and grievances. Saying man changes with time, he gave Sanyal Rs. 150 for the medal. But Sanyal refused to accept the money. Finally he handed over the silver medal to him after 29 years. Thus he proved that he changed with time.
33. The poet tells us that the house located on the Elm Street is a mysterious one. No one knows till today what happens in that house. At night, lights flicker on and off and cause fear in the minds of the passer-by. The flickering lights increase its mystery. During summer the house looks brighter. The poet is confused a bit on seeing it. A barren tree is beside the house. It never has any leaves. It neither gets small nor grows tall. The poet has a question in his mind about the house as well as about the tree. It remains unanswered. This is how the mystery about the house and the tree is portrayed in this poem.
34. 'The Ant and the Cricket' is a narrative poem. Through the last line, the poet teaches us a moral lesson. That is, pre-planning and hard work is essential for every creature. The poet talks about the attitudes of the hard working ant and the careless cricket in this poem. The wise and hard working ant spent his summer to save for the winter. But the young silly and careless cricket spent his summer in enjoyment. He sang all day and night. He did not save for the winter. He had to go to his ant-friend begging for food and shelter. Here the poet projects the cricket as the borrower struggling in difficult times. But the ant is projected as neither a borrower nor a lender. He is projected as wise, pre-planning, hard working and saving for future. When the cricket asked the ant for help, he angrily told him to go away and dance in the winter too. Through this poem, the poet advises the readers to be like the ant and not to be like the cricket.

A forest is known as an intricate ecosystem that is densely covered with trees, shrubs, grasses and mosses. The trees and other plants that form a part of the forests create an environment that is healthy for the breeding several species of animals. These are thus a habitat for a large variety of wild animals and birds. Different types of forests grow in different parts of the world. These are mainly divided into three categories- Rain Forests, Coniferous Forests and Deciduous Forests. Forests form an important part of the ecological system mainly because they aid majorly in biodiversity. A large number of birds and animals survive only because of the presence of forests. However, unfortunately forests are being cut at a rapid speed to serve various purposes. The increase in the demand of various commodities derived from the trees that grow in different forests and the need to accommodate the growing population are among the major reasons for deforestation. It is important to realize that forests are essential for the survival of the mankind. Forests help in purifying the atmosphere, aid in climate control, act as natural watershed and are a source of livelihood for many people. Forests must thus be preserved. Deforestation is a global issue and effective measures must be taken to control this issue.

Chennai, formerly Madras is the capital of Tamilnadu, in Southern India, on the Coromandel Coast of the Bay of Bengal. Known as the "Gateway to South India," Chennai is a major administrative and cultural centre. Armenian and Portuguese traders were living in the Santhome area of what is now present-day Chennai before the arrival of the British in 1639. Madras was the shortened name of the fishing village Madraspatnam, where the British East India Company built a fort and factory (trading post) in 1639-40. At that time, the weaving of cotton fabrics was a local industry, and the English invited the weavers and native merchants to settle near the fort. By 1652 the factory of Fort St. George was recognized as a presidency (an administrative unit governed by a president), and between 1668 and 1749 the company expanded its control. About 1801, by which time the last of the local rulers had been shorn of his powers, the English had become masters of southern India, Madras had become their administrative and commercial capital. The government of Tamil Nadu officially changed the name of the city of Chennai in 1996.

32. M.Hamel was the French teacher in Alsace. He had been teaching the language to the people of Alsace for forty years. Since the Prussians had occupied Alsace, they ordered to stop teaching French and to teach only the German language. M.Hamel felt that the people of Alsace had neglected learning the language. They had postponed their daily learning. The parents of the students had sent them to work on a farm or at a mill to earn a little money.

M.Hamel himself had sent the students to water his flower plants or declared holiday when he wanted to go fishing. The teacher and the villagers realized that it had been too late. Franz also felt a little depressed for not showing interest at learning. But having realized that the last day had come, he had the courage to listen to his teacher to the very last. Old Hauser began to cry as he was unable to read from his primer. They realized the value when M.Hamel praised the greatness of the French language. As they were about to lose their teacher and the French lessons, they valued the greatness of it.

33. "The Ant and the Cricket" is an excellent poem with a message for all. The ant teaches the cricket a lesson about hard work. It also teaches the human beings on the importance of hard work. People seek easy money without effort. They wish only an effortless life. These lazy people do not earn their livelihood. They do not store anything for future. Some people want to be happy at present. The ant teaches these men that they should work hard for what they want because it won't come to them without a fight.

"The future depends on what you do today"

The cricket just enjoyed singing and dancing. Naturally it had to beg for food for the future. But the ant laboured and saved for the future that was very pleasant. Some people are imprudent like the cricket. Some are wise like the ant. The poet tells us a message through the poem that people have to work to live a life of happiness, contentment and joy.

34. The poet appeals for universal brotherhood in this poem. He says that men living in other countries are like us only. Their colour, way of dressing and food habits may vary. But they get the same sunlight, breathe the same air and drink the same water as we do. Though they may wear different clothes, they have the same body like ours. The land we live and die are the same. Their experience of war and peace are the same as ours. The poet asks us not to hate them as strangers. If we hate others, it means we hate ourselves. Moreover when we fight, we pollute the earth and poison the air. Therefore the poet says that we should put an end to war for we are all brothers.

The first flags were probably in China. People flew flags in China over 4,000 years ago. Each part of the army had its own flag so the soldiers could see their leaders. Early flag was sticks of wood. They had pictures cut into the wood. Iran had metal flags about 3,000 years ago. Old Greek coins show pictures of flags. People in Rome also used flags over 2000 years ago. People first made flags of cloth about 2000 years ago. Those flags looked like today's flags. Flags are important at sea. Most ships fly their own country's flag and the flag of the country they are visiting. When a ship flies only its own flag, it is ready to fight. Every country now has a flag. Every U.S. state has a flag. Clubs, teams, and schools have flags. The Olympics has a flag. The Olympics flag has five rings of five colours. Each ring stands for, or represents, a continent. It means that people from five continents – Africa, Asia, Europe, North America, and South America – come to play. Railway lines also use flags. Railway flags tell the trains what to do. For example, a red flag tells the train to stop just like a stop sign. A blue, white, or green flag tells the train that it can go. A blue flag on the side of a train means someone is working on the train. It means nobody can move the train.

Questions:

- i) How many flags do most ships fly?
- ii) What were the first flags made of?
- iii) Describe the Olympic flag.
- iv) Mention the role of a railway flag.

Respected Sir,

Please publish this letter in your daily.

Recently I participated in the health camp organised by our school at Nallampatti in Salem district. Most of the people use only open toilets. They are not aware of the health issues arising out of it. Therefore such camps should be organised often in the villages focusing on the importance of health and hygiene.

Thanking you,

Yours faithfully,
Anand.

A forest is known as an intricate ecosystem that is densely covered with trees, shrubs, grasses and mosses. Different types of forests grow in different parts of the world. These are mainly divided into three categories – Rain Forests, Coniferous Forests and Deciduous Forests. Forests form an important part of the ecological system mainly because they aid biodiversity.

Unfortunately, forests are being cut at rapid speed to serve various purposes. The increase in the demand of various commodities derived from the trees that grow in different forests and need to accommodate the growing population are the major reasons for deforestation. It is important to realise that forests are essential for the survival of mankind. Forests help in purifying the atmosphere, aid in climate control, act as a natural watershed and source of livelihood for many people. Forests must thus be preserved. Deforestation is a global issue and effective measures must be taken to control this.
