Cost of revenue from operations = Purchases of stock-in-trade + Change in inventories of stock in trade + Direct expenses (wages)

$$= 4,50,000 + (40,000) + 10,000 = \text{Rs.} 4,20,000$$

Operating expenses = Administrative expenses + Selling and distribution expenses + Employee benefits expenses (salaries)

$$= 20,000 + 28,000 + 12,000 = \text{Rs.} 60,000$$

Operating cost = Cost of revenue from operations + Operating expenses

$$= 4,20,000 + 60,000 = \text{Rs.} 4,80,000$$

Tutorial Note

Loss on sale of fixed assets is a non-operating item, hence it is ignored.

### (iii) Operating profit ratio

Operating profit ratio gives the proportion of operating profit to revenue from operations.

Operating profit ratio is an indicator of operational efficiency of an organisation. It may be computed as follows

$$\text{Operating profit ratio} = \frac{\text{Operating profit}}{\text{Revenue from operations}} \times 100$$

Alternatively, it is calculated as under.

$$\text{Operating profit ratio} = 100 - \text{Operating cost ratio}$$

$$\text{Operating profit} = \text{Revenue from operations} - \text{Operating cost}$$

A higher ratio indicates better profitability. Greater the operating ratio, higher is the margin available for paying non-operating expenses

### Tutorial note

$$\text{Operating cost ratio} + \text{Operating profit ratio} = 100\%$$

40) In Tally, to record transactions, the transactions are to be identified with the related ledger accounts. In Tally ERP 9, there are two types of pre. defined ledgers.

(i) Cash: Under the group cash-in-hand this ledger is created, you can enter the opening balance as on the books beginning from.

(ii) Profit and loss account : This ledger is created under the group primary. In this ledger previous year's profit or loss is entered as the opening-balance of this ledger.

To create ledger:
