A PUPPY IN A KENNEL

43. Make notes or write a summary of the following passage:
- Water is the basis of all life. Every animal or plant contains a substantial proportion of free or combined water in its body, and no kind of physiological activity is possible in which the fluid does not play an essential part. Water is, of course, necessary for animal life, while moisture in the soil is equally imperative for the life and growth of plants and trees though the quantity necessary varies enormously with the species. The conservation and utilization of water is thus fundamental for human welfare. Apart from artesian water the ultimate source in all cases is rain or snowfall. Much of Indian agriculture depends on Seasonal rainfall and is therefore very sensitive to any failure or irregularity of the same. The problem of soil erosion and of inadequate or irregular rainfall are closely connected with each other. It is clear that the adoption of techniques preventing soil erosion would also help
