There is an enemy beneath our feet. He recognizes no national boundaries, no political parties. Everyone in the world is threatened by him. The enemy is the Earth Quake. The power of a quake is greater than anything man himself can produce. But today scientists are diverting more of the efforts into finding someway to combat earthquakes and it is possible that at some time in the near future mankind will have discovered a means of protecting itself from it. An earthquake strikes without warning. When it does, its power is immense. If it strikes a modern city, it can take down buildings and cause death and injury. If the quake strikes the sea, huge tidal

waves sweep inland. If it strikes in mountain regions, avalanches roar down the valleys. There are three regions in the world where earthquakes are mostly likely to happen scientists call them earthquake zones. The first runs along the East coast of the Asia continent and the second runs down the West coast of South America. The third runs across the South of Europe and North Africa. If you take a map of the world and mark on it the locations of all the major earthquakes. In history, you will see that they have occurred somewhere in these zones. So it is possible for scientists to say where the earthquakes will strike but they cannot say exactly when.
