

Coast of South America. The third runs across the South of Europe and North Africa. If you take a Map of the World and mark on it the locations of all major earth quakes in history, you will see that they have occurred somewhere in these zones. So, it is possible for scientists to say where the earth quakes will strike, but they cannot say exactly where.

The Government is taking seriously the issue of road safety and is committed to reduce the number of people killed in accidents. Discussions are being conducted regularly to bring law-makers, law enforcement officers and road users together to discuss ways to tackle the rise in road accidents. Everyone agrees that more needs to be done on road safety in its determination to curb the rate of road accidents in the country. The Government is making serious efforts to instill proper road culture in children, young adults and the public in general. Within 10 months, the traffic police issued 1,43,077 summons to motorists for traffic light related offences. The traffic police, however, have taken a tough stand against traffic light defaulters by making them pay hefty fines. Typical reasons given for beating traffic lights include rushing to an urgent appointment or even worse, to be complete oblivious of the changing of the lights. Usual punishments include a fine, a ban on driving for a specified time and may even be a prison sentence. Sometimes, the court may even order to pay out compensation if death occurs as a result of the accident.

Questions:

- i) Why is the Government taking the issue of road safety seriously?
 ii) What steps is the Government taking to tackle the rise in road accidents?
 iii) How many people were caught breaking the rules about traffic lights in the first ten months?
 iv) Give two reasons as to why people said they broke the rules about traffic lights.

There is an enemy beneath our feet. He recognizes no national boundaries, no political parties. Everyone in the World is threatened by him. The enemy is the Earth Quake. The power of a quake is greater than anything man himself can produce. But today, scientists are diverting more of the efforts into finding some way to combat earth quakes and it is possible that at sometime in the near future mankind will have discovered a means of protecting itself from it. An earth quake strikes without warning when it does, its power is immense. If it strikes a modern city, it can take down buildings and cause death and injury. If quake strikes the Sea, huge tidal waves sweep inland. If it strikes in mountain regions, avalanches roar down in the valleys. There are three regions in the World where earth quakes are most likely to happen. Scientists call them earth quake zones, the first runs along the East Coast of the Asian Continent and the second runs down the West
