 despair – received a letter – from Basil – called off the wedding – displeasing situation –
 lamenting song – speeding up music – headmistress called – another letter – pay no
 attention – first letter – happy – all is well that ends well.

44. (a) Summarize the following passage:

Trees not only supply us with many of the conveniences of our daily life, they do much more than that. They support the life of living things. They help to replace the oxygen in the air constantly being used up and turned into carbon-dioxide when animals breathe and things burn. The green leaves of trees absorb the carbon-dioxide from the air and with the help of sunlight break it up into carbon and oxygen. The carbon is used to make starch and oxygen is released into the atmosphere. That is how trees help to replace the oxygen in the atmosphere. The green cells of leaves are wonderful little laboratories, where all the starch in the world is produced. Since starch forms an important part of the food of men and animals, their life depends on the work done by the green cells of plants. Thus trees are great friends of man.

45. (a) Read the following advertisement and prepare a resume considering yourself fulfilling the conditions specified:

SALES PERSON WANTED

[Education, Travel, Space, Law, Nutrition and Dietetics]

(OR)

(b) Read the following passage and answer in your own words.

Preserving Nature is man's prime responsibility. The earth does not belong to us for us to use and abuse. It belongs to our children. As man became civilized, he slowly lost his attachment with Nature. In his quest for development, man cleared pristine forests and polluted the environment. The magnitude of destruction increased in proportion to the magnitude of his greed. As man drifted away from Nature, his problems increased and his heart became hard and cold. The many calamities, misfortunes and problems of our times are but the manifestation of this greed. This is why we have injured people, animals and environment. If we want to set things right we must reconnect with Nature.

Questions:

(i) What is the prime responsibility of man?

(ii) Whom does the earth belong to?

(iii) When does man lose attachment with Nature?

(iv) What is the manifestation of man's greed?

(v) What should you do to set things right?
