The young Seagull:

The young Seagull was one among the four offsprings of the father and mother Seagulls. He was very timid. He was alone on the ledge. Unlike his two brothers and sister, he was afraid to fly. He failed to muster up courage to fly.

The reaction of his parents:

His parents had come around calling him shrilly, scolding him and threatening to let him starve on the ledge. He had no food. He could find nothing but the dried pieces of eggshell to eat. His parents wanted to teach him to fly.

The young one's first flight:-

So the mother seagull show a piece of fish to the hungry young seagull. But he couldn't reach the food as it was out of reach. Maddened by hunger, he dived at the fish. In order to grab it he had no choice other than to flap his wings and to fly towards his meal.

Landing on the water:-

He landed on the green sea and sank into it. His belly touched the water and he sank no farther. He was floating on the water.

Qn.No.

The reaction of the family:

The young bird's family was very happy. His mother swooped past him, his father flew over him and his brother and sister were flying around him, high and low, out of joy. Thus, his natural bird instinct and his urge for survival prompted him to fly finally.

Conclusion:

These are the struggles underwent by the young seagull to overcome its fear of flying.

Different types of forests grow in different parts of the world. These are mainly divided into three categories - Rain Forests, Coniferous Forests and Deciduous Forests. Forests form an important part of the ecological system mainly because they aid biodiversity.
- Unfortunately, forests are being cut at rapid speed to serve various purposes. The increase in the demand of various commodities derived from the trees that grow in different forests and need to accommodate the growing population are the major reasons for deforestation. It is important to realise that forests are essential for the survival of mankind. Forests help in purifying the atmosphere, aid in climate control, act as a natural watershed and source of livelihood for many people. Forests must thus be preserved. Deforestation is a global issue and effective measures must be taken to control this.
