

PUBLIC EXAMINATION MARCH – 2024**12TH COMPUTER SCIENCE****ANSWER KEY****1 Marks:**

1. C) Big O
2. C) Abstract Data type
3. B) F5
4. A) Interface
5. A) Access control
6. D) []
7. C) Instantiation
8. D) $x \% 4 == 0$
9. B) σ
10. A) [10,20,35,40,50]
11. B) Flat File
12. D) select
13. A) 0 1 3 4
14. D) Dashboard
15. D) ORDER BY

24. Use of pop():

- . pop() function can also be used to delete an element using the given index value.
- . pop() function deletes and returns the last element of a list if the index is not given.

33. TCL Commands:

Transactional control language (TCL) commands are used to manage transactions in the database. These are used to manage the changes made to the data in a table by DML statements.

Commit	Saves any transaction into the database permanently.
Roll back	Restores the database to last commit state.
Save point	Temporarily save a transaction so that you can rollback.
