Unit - 14Computerised AccountingI. Very Short Answer Questions :-

1. What is a computer?

Ans:- i) Computer is an electronic device.

ii) It can perform a number of arithmetic and logical operations as per given set of instructions.

2. What is CAS?

Ans:- i) Computerised accounting system refers to the system of maintaining accounts using computers.

ii) It involves the processing of accounting transactions through the use of hardware and software in order to keep and produce accounting records and reports.

3. What is hardware?

Ans:- i) The physical components of a computer constitute its hardware.

ii) Hardware consists of input devices and output devices that make a complete computer system.

4. What is meant by software?

Ans:- ⇒ A set of programs that form an interface between the hardware and the user of a computer system are referred to as software.

5. What is accounting software?

Ans:- i) The main function of CAS is to perform the accounting activities in an organisation. and

ii) Generate reports as per the requirements of the users

6. Name any two accounting packages :-

Ans:- The accounting software or packages are as follows:-

⇒ Ready made software.

⇒ Customised software.

⇒ Tailormade software.

7. Give any two Examples of ready made software.

Ans: Examples of Ready made Software :-

- ⇒ Tally
- ⇒ Busy
- ⇒ Marg
- ⇒ profit books

8. What is coding?

Ans: i) Code is an identification mark.

ii) The coding scheme of account head should be such that it leads to grouping of accounts at various levels so as to generate various reports.

9. What is grouping of accounts?

Ans: i) A proper codification requires a systematic grouping of accounts.

ii) The major groups or heads could be Assets, liabilities, Revenues and Expenses.

iii) The sub-groups or minor heads could be capital, non current liabilities, current assets, sales and so on.

Ans: A mnemonic code consists of alphabets or abbreviation or symbols to codify a piece of information.

For example :-

code	information
SS	Sales Journals
HQ	Head Quarters

III. Short Answer Question :-

1. What are the various types of accounting software?

Ans: There are three types of software namely:

i) Ready - made software.

ii) Customised software and

iii) Tailor-made software

2. Mention any three limitations of Computerised accounting System.

Ans:- i) Heavy cost of Installation :-

⇒ Computer hardware needs replacement and software needs to be updated from time to time with the availability of newer versions.

ii) Cost of Training :-

⇒ To ensure effective and efficient use of computerised system of accounting, newer versions of hardware and software are to be introduced.

⇒ These require special training and hence, cost is incurred to train the staff personnel.

iii) Fear of unemployment :-

⇒ On account of the introduction of computerised accounting system, the employees feel insecure that they may lose employment and show less interest in computer related work.

3. State the various types of coding methods.

Ans! Following are the three methods of codification.

(a) Sequential codes

⇒ In sequential code, numbers and/or letters are assigned in consecutive order.

⇒ These codes are applied primarily to source documents such as cheques, invoices, etc.

⇒ A sequential code can facilitate document search.

For Example! -

Code	Accounts
CL001	ABC LTD
CL002	XYZ LTD
CL003	SCERT

(b) Block codes :-

⇒ In a block code, a range of numbers is partitioned into a desired number of sub-ranges and each sub-range is allotted to a specific group.

⇒ In most of the cases of block codes, numbers within a sub-range follow sequential coding scheme, i.e., the numbers increase consecutively.

For example:-

Code	Dealer types
100-199	Small pumps
200-299	Medium pumps
300-399	Pipes
400-499	Motors

(c) Mnemonic codes :-

⇒ A mnemonic code consists of alphabets or abbreviations or symbols to codify a piece of information.

For example :-

Code	Information
SJ	Sales Journals
HQ	Head Quarters

4. List out the various reports generated by computerised accounting system.

Ans: ⇒ Computerised accounting system takes accounting transactions as inputs that are processed through accounting software to generate the following reports:

- i) Day books / Journals
- ii) Ledger.
- iii) Trial balance.
- iv) Trading account.
- v) profit and loss account.
- vi) Balance sheet.

5. State the input and output devices of a computer system.

Ans: i) Input Devices :-

- (a) Key board.
- (b) optical scanner.
- (c) Mouse.
- (d) Joystick.

ii) output Devices

- (a) monitor.
- (b) printer.
