

**HIGHER SECONDARY SECOND YEAR
CHEMISTRY
VOLUME II
IMPORTANT QUESTIONS FOR SLOW LEARNERS**

8. IONIC EQUILIBRIUM

1. Define Arrhenius concept of Acid and Base? Pg. no 2
2. What are the limitations of Arrhenius concept ? Pg.no 3
3. Give Lowry Bronsted Theory concept of Acid and Base? 3
4. Give lewis concept of Acid and Base? 4
5. Bring the difference between Lewis acid acids and Lewis bases? 5
6. What is meant by ionization of water? 7
7. Define PH? 9
8. Give Ionisation of weak acids? 12
9. Define Ostwalds Dillution law? 12
10. What is Common Ion effect? 15
11. What is Buffer Solution? What are its types? 18
12. What is Buffer index? 18
13. What is Buffer Capacity? 18
14. What is Salt Hydrolysis? 21
15. What is meant by Solubility Product? 24

9. ELECTRO CHEMISTRY

1. Define Resistivity? 35
2. What is Conductivity? 35
3. What is molar conductivity? 36
4. What is Equivalent Conductance? 37
5. What are the factors affecting electrolytic conductance? 37
6. Give Debye – Huckel and Onsager equation? 41
7. What is Kohlraush Law? 41
8. What are the applications of Kohlraush Law? 42
9. Define Electrochemical cell? What are its types? 43
10. What is Half cells? How it is representated? 44
11. What is Salt Bridge?
12. Give Galvanic cell notation? 46
13. Define emf of a cell? 47

14. What is electrode potential? 49
15. What is Standard electrode potential (SHE)? 49
16. Give Nernst equation? 51
17. What is meant by electrolytic cell? 53
18. Give Faraday's First law of electrolysis? 54
19. Give Faraday's Second law of electrolysis? 55
20. What is meant by Battery? What are its types? 56
21. Write short note on Leclanche cell? 56
22. Write short note on Mercury button cell? 57
23. Write short note on Lead storage battery? 58
24. What is Recharge of the cell? 58
25. Write short note on Lithium – Ion battery? 58
26. Write short note on H₂O₂ fuel cell? 59
27. What is meant by Corrosion? 60
28. What are the methods to protect metals from corrosion? 61
29. What is Passivation? 61
30. What is meant by electrochemical series? 62

10. SURFACE CHEMISTRY

1. What is meant by Adsorption and Absorption? 70
2. What are the types of adsorption? 71
3. Distinguish between Chemisorption and Physisorption? 71
4. What are the factors affecting adsorption? 72
5. What are the applications of adsorption? 75
6. Define Catalyst? What are its types? 77
7. What is Homogeneous catalyst and Heterogeneous catalyst? Give examples 77
8. What are the important Characteristics of catalysis? 78
9. What is meant by Promoters? Give example. 79
10. What is meant by auto catalyst? Give example. 79
11. What is Enzyme Catalysis? 83
12. What is Zeolite Catalysis? 84
13. What is Colloid? 86
14. What are the classifications of colloids? 87
15. What are the methods used in preparation of colloids? 88 89
16. What is meant by dialysis? 91
17. What is meant by electrodialysis? 91
18. What are the factors depends on Colour of the Sol? 92
19. Define Brownian movement? 94

20. What is Tyndall effect?
21. What is Helmholtz double layer? 94
22. What is meant by electrophoresis? 94
23. What is meant by electro osmosis? 95
24. What are the various methods of coagulation? 96
25. What is Gold number? 96
26. What is Emulsions? What are its types? 97
27. How will you identify types of emulsion? 97
28. What are the various deemulsification techniques? 97
29. What are the applications of colloids?
30. What is the test to identify natural honey or artificial honey? 100

11. HYDROXY COMPOUNDS AND ETHERS

1. What is saytzeff's rule? 116
2. Give Swern oxidation reaction? 117
3. Give the preparation of formaldehyde from glycol with periodic acid? 120
4. Give the preparation of acrolein? 121
5. Give the preparation of TNG? 121
6. Give the two uses of methanol, ethanol, ethylene glycol and glycerol? 122
7. Why phenol is more acidic than alcohol? 124
8. Give Dow's process? 126
9. Give Schotten Baumann reaction? 127
10. Give Williamson synthesis for ether? 127
11. How picric acid is prepared? 129
12. Give Kolbe's reaction? 130
13. Give Rimer Tiemann reaction? 130
14. Give coupling reaction? 131
15. What are the test to differentiate alcohol and phenol? 131
16. Give three uses of phenol? 131
17. How anisole undergoes in Fridel craft's reaction? 138
18. Write the uses of anisole and diethyl ether? 138 139

12. CARBONYL COMPOUNDS AND CARBOXYLIC ACIDS

1. Give ozonolysis reaction for the preparation of aldehydes? 149
2. Write Rosenmund Reaction? 151
3. What is Etard Reaction? 151
4. Write Gattermann – Koch Reaction? 152

5. Why aldehyde and ketones having high dipole moment? 154
6. Give the preparation of Urotropine? 158
7. What are the uses of Urotropine? 158
8. What is Popoff's rule? 159
9. Write Clemmensen reduction? 160
10. Write Wolf Kishner reduction? 161
11. What is Haloform reaction? 161
12. What is meant by aldol condensation? 161
13. What is meant by Crossed aldol condensation? 162
14. Write Claisen – Schmidt reaction? 163
15. What is Cannizaro reaction? 163
16. Write Benzoin Condensation? 164
17. What is Perkin's reaction? 165
18. How Schiff's base is prepared? 165
19. Write Knoevenagal reaction? 165
20. What are the test for aldehydes? 166
21. What are the uses of aldehydes and ketones? 167
22. How carboxylic acid is prepared from Grignard reagent? 170
23. Why carboxylic acids are having high boiling point? 171
24. What is meant by glacial acetic acid? 172
25. What is called as decarboxylation? 175
26. Write Hell Volhard Zelinsky (HVZ) reaction? 176
27. What are the test for carboxylic acid? 177
28. What is Transesterification? 185
29. What is Hoffmann's degradation? 188
30. What are the uses of Carboxylic acids and its derivatives? 188

13. NITROGEN COMPOUNDS

1. What is meant by Tautomerism? 199
2. Give the industrial preparation of nitroalkane compounds? 200
3. How amino group converted into nitro group? 202
4. What happens when nitro compounds undergoes reduction with Ni? 204
5. Write the structure of amines? 208
6. Give Gabriel phthalimide synthesis? 209
7. What is Sabatier Mailhe method? 210
8. What is salivation effect? 213
9. Write Schotten Baumann reaction? 214
10. What is meant by diazotization? 215
11. Write the Libermann's nitroso test? 215
12. What is carbylamine reaction? 216

13. Give the Mustard oil reaction? 216
14. Write the Sandmeyer reaction? 220
15. Give the Gattermann reaction? 220
16. What is Bantz schiemann reaction? 221
17. Give the coupling reaction of benzene diazonium chloride? 222
18. What is Levine and Hauser acetylation? 225
19. What happens when alkyl isocyanide hydrolysed with dil.mineral acids? 227
20. What are the uses of organic nitrogen compounds? 228

14. BIOMOLECULES

1. What is meant by carbohydrates? 238
2. Give the structure of Glucose and Fructose? 238
3. What is meant by Monosaccharides? 240
4. Write a note on Glucose structure? 241
5. What is meant by anomers? 243
6. What happens when glucose is reacted with fehling's and tollens solution? 242
7. What is epimerization? 244
8. Write a note on Fructose structure? 245
9. What are Disaccharides? 247
10. What is meant by Glycosidic Linkage? 247
11. What are Polysaccharides? 248
12. What are cellulose? 249
13. What are the importance of carbohydrates? 250
14. What are Proteins? 250
15. What is isoelectric point? 252
16. What is Peptide bond? 252
17. What are the classifications of proteins? 253
18. What is denaturation? 256
19. What are the importance of proteins? 256
20. What are enzymes? 257
21. What are Lipids? 257
22. What are the biological importance of lipids? 258
23. What are Vitamins? 258
24. What are nucleic acids? 260
25. What are Ribose and deoxyribose? 262
26. What are nucleoside? 262
27. What are the types of RNA molecules? 264

28. Bring out the difference between DNA and RNA? 264
29. Write a note on DNA finger printing? 265
30. What are Hormones? What are its types? 266, 267

15. CHEMISTRY IN EVERYDAY LIFE

1. What are drugs? What are its classifications? 273
2. What is called as antagonists? 276
3. What is Tranquilizers? What are its uses? 277
4. What is meant by Anaesthetics? What are its uses? 279
5. What are Antacids? What are its uses? 279
6. What are Food additives? 282
7. What are the important categories of food additives? 283
8. What are the advantages of food additives? 283
9. What is meant by Antioxidants? 283
10. What are sugar substituents? 283
11. What are polymers? 285
12. Give the preparation of LPDE and HDPE? 288
13. Give the preparation of Nylon 6,6? 289
14. Give the preparation of Nylon 6? 289
15. How Bakelite is prepared? 290
16. What is meant by natural and synthetic rubbers? 291
17. Give the preparation of Buna N? 292
18. Give the preparation of Buna S? 292
19. What are Biodegradable Polymers? 293
20. What is Nylon-2-Nylon-6? 293
