	<p>Q.No. 55-60 are to be answered on the basis of the following data: India's post-1990 economic strategy entailed three important breaks with the past:</p> <ul style="list-style-type: none"> ● To dismantle the vast network of controls and permits that dominated the economic system. ● To redefine the role of the state as a facilitator of economic transactions and as a neutral regulator rather than the primary provider of goods and services. ● To move away from a regime of import substitution and to integrate fully with the global trading system. <p>The 1991 reforms unleashed the energies of Indian entrepreneurs and gave untold choice to the consumers and changed the face of the Indian economy. The reform agenda constituted a paradigm shift, and has defined the broad contours of economic policymaking for three decades.</p> <p>Liberalization was adopted as the guiding principle of governance and all governments since 1991, have broadly stuck to that path.</p> <p>Today we don't need a paradigm shift. We need to look at individual sectors and see which one of these needs, reforms to create a competitive environment and improve efficiency. The power sector, the financial system, governance structures and even agricultural marketing need reforms.</p> <p>Today's reforms also require much more discussion and consensus-building. The central government needs to work in tandem with state governments and consult different stakeholders impacted by reform decisions. Timing and sequencing are critically important in the new reforms' agenda.</p> <p>Source: Excerpts from 'Like 1991, the 2021 crisis presents an opportunity, by C.Rangarajan, 22nd January 2021(livemint.com)</p>
