**Exercise-4:**

“DEAR TOM: This box contains a large number of very fine pigeon-blood rubies and a fair lot of diamonds; one is blue—a beauty. There are hundreds of pearls—one the famous green pearl and a necklace of blue pearls, for which any woman would sell her soul—or her affections.” I thought of Susan. “I wish you to continue to have expectations and continuously to remember your dear uncle. I would have left these stones to some charity, but I hate the poor as much as I hate your mother’s son,—yes, rather more. “The box contains an interesting mechanism, which will act with certainty as you unlock it, and explode ten ounces of my improved, supersensitive dynamite no, to be accurate, there are only nine and a half ounces.

- i) *What does the box contain?*
- ii) *Whom did the narrator think of?*
- iii) *What was his uncle’s wish?*
- iv) *Whom did he hate?*
- v) *Name the mechanism.*

**Exercise-5:**

In my despair I consulted Professor Clinch

about my dilemma, and as to some safe way of getting at the rubies. He said that, if my uncle had not lied, there was none that would not ruin the stones, especially the pearls, but that it was a silly tale and altogether incredible. I offered him the biggest ruby if he wished to test his opinion. He did not desire to do so. Dr. Schaff, my uncle’s doctor, believed the old man’s letter, and added a caution, which was entirely useless, for by this time I was afraid to be in the room with that terrible box.

- i) *Whom did he consult?*
- ii) *What did he consult about?*
- iii) *What did he say?*
- iv) *What was his offer?*
- v) *Who was his uncle’s doctor?*

Many of us use internet on a regular basis and even have access to it from our homes! The 'net in internet really stands for network. A network is two or more computers connected together so that information can be shared, or sent from one computer to another. The internet is a vast resource for all types of information. You may enjoy using it to do research for a school project, downloading your favorite songs or communicating with friends and family. Information is accessed through web pages that companies, organizations and individuals create and post. It's kind of like a giant bulletin board that the whole world uses! But since anyone can put anything on the internet, you also have to be careful and use your best judgement and a little commonsense.

Just because you read something on a piece of paper someone sticks on a bulletin board doesn't mean that it's a good information, or even correct, for that matter. So you have to be sure that whoever posted the information knows what they are talking about, especially if you are doing research! But what if you're just emailing people? You still have to be very careful. If you've never met the person that you're communicating with

online, you could be on dangerous ground! You should never give out any personal information to someone you don't know, not even your name. And just like if you can't believe the information on every website out there, you can't rely on what strangers you 'meet' on the internet tell you either. Just like you could make up thing about yourself to tell someone, someone else could do the same to you.

It is not growing like a tree  
In bulk, doth make man better be;

To fall a log at last, dry, bald, and sere;  
A lily of a day  
Is fairer far in May,

And in short measures life may perfect be.
