HISTORY

1. Outbreak of World War I and Its Aftermath

Introduction

The industrial revolution enabled the capitalist countries of the west to produce a lot of products cheap. They needed markets to sell their finished goods. They also needed colonies for the steady supply of raw materials. The scramble for colonies in Asia and Africa led to bitter rivalry between the capitalist nations. Japan used strong arm diplomacy to expand her colonies.

China and the European powers hated the emergence of Japan as a strong capitalist country. Europe got divided into two warring groups with alliances and counter alliances. Nationalism gained great power in the capitalist nations. France resented the loss of her territories Alsace and Lorraine to Germany.

The power politics in the Balkan States fuelled the rising anger among the capitalist countries. Germany's attack on Lusitania provoked America to enter into the war. The war gained the dimensions of a global war as it affected the whole world and its civilian population. The League of Nations, drawn to conclude the war, and maintain world peace, could not succeed in preventing the outbreak of another world war.

VI. Answer the following in detail

1. Discuss the main causes of the First World War. (PTA - 1, Sep.-20, 21, May-22, Apr.-24)
European Alliances and Counter Alliances:

Europe was divided into two military camps viz. Central Powers and the Allies. Germany, Austria - Hungary, and Italy, (Central Powers) formed the Triple Alliance in 1882 under the guidance of Bismark.

England, France and Russia (the Allies) formed the **Triple Entente**. Thus the two blocks called "the Central Powers and the Allies" became possible to confront each other.

Violent forms of Nationalism :

England's Jingoism, France's Chauvinism and Germany's Kultur were violent forms of Nationalism. They contributed decisively to the out break of World War I.

Aggressive attitude of The German Emperor Kaiser Wilhelm II :

Emperor **Kaiser Wilhelm II** declared that Germany would be the leader of the world. Unable to forget the humiliating defeat at Trafalgar, Germany **built naval bases** rapidly.

Being aware of a possible attack from Germany, Britain also embarked on a naval race. This increased the tension between these two countries.

Hostility of France towards Germany :

France continued to nurse the pain of losing Alsace and Lorraine to Germany. Kaiser Wilhelm II demanded an international conference to decide the future of Morocco. German interference in Morocco added to its bitterness.

Imperial power politics in Balkans :

Exploiting the instability of Turkey, the Balkan countries ceded from it. The Balkan League attacked Turkey. As per the **Treaty of London** (May 1913) **Albania** was created, Macedonia was divided and Turkey was reduced.

In the Second Balkan War, Bulgaria attacked Serbia and Greece. But Bulgaria was defeated easily. **War ended** with the **Treaty of Bucharest in August** 1913.

Immediate cause :

On 28th June 1914, Austrian Crown prince Franz Ferdinand was assassinated by Bosnian Serb called Princip at Sarajevo in Bosnia. Austria wanted to eliminate Serbia. Germany declared war on Russia on 1st August 1914. **Germany** had to **attack France** as they had made an alliance with Russia.

The German violation to Belgian neutrality forced Britain to enter the war.

2. Highlight the provisions of the Treaty of Versailles relating to Germany.

(PTA - 2, 6, July-23)

Germany was found guilty of starting the war. Germany was forced to pay huge war losses. German army got reduced to the minimum of 1,00,000 soldiers.

Union of Austria and Germany was forbidden. Germany was asked to **revoke** the Treaty of Brest - Litovsk. Alsace and Lorraine were restored to France.

Former Russian territories of Finland, Estonia, Latvia and Lithuania gained independence. Denmark received Schleswig. Poland was recreated. Allies occupied Rhineland demilitarising the east bank.

3. Explain the course of the Russian Revolution under the leadership of Lenin.

Lenin was in Switzerland when the revolution broke out. His slogans “**All Power to Soviets**” and “**Bread, Peace and Land**” attracted the masses. Bolsheviks rose against the Provisional Government.

It had failed to redistribute lands and decided to continue the war. These were resented by the masses.

Lenin's leadership :

In October 1917, Lenin persuaded Bolshevik Central Committee to decide on immediate revolution. Trotsky prepared a detailed plan.

On 7th November, the key Government buildings were seized by armed factory workers and revolutionary troops.

On 8th November 1917, a **new Government was** in office **in Russia**. This time Lenin was the head. Bolshevik Party was renamed as the Communist Party.

4. Estimate the work done by the League of Nations.

(PTA - 4, Apr.-24)

The League of Nations was established in **1920** to avoid war and maintain peace in the world. From 1920 to 1925, the League of Nations was asked to settle a number of issues. It was successful in tackling three issues. In **1920**, a dispute arose between Sweden and Finland over the Sovereignty of Aaland Islands.

The League ruled that the Aaland islands should go to Finland. **In 1921**, the League was asked to settle the frontier between Poland and Germany in upper Silesia.

In 1929 the Vietnamese soldiers mutinied, and there was a failed attempt to assassinate the French Governor-General.

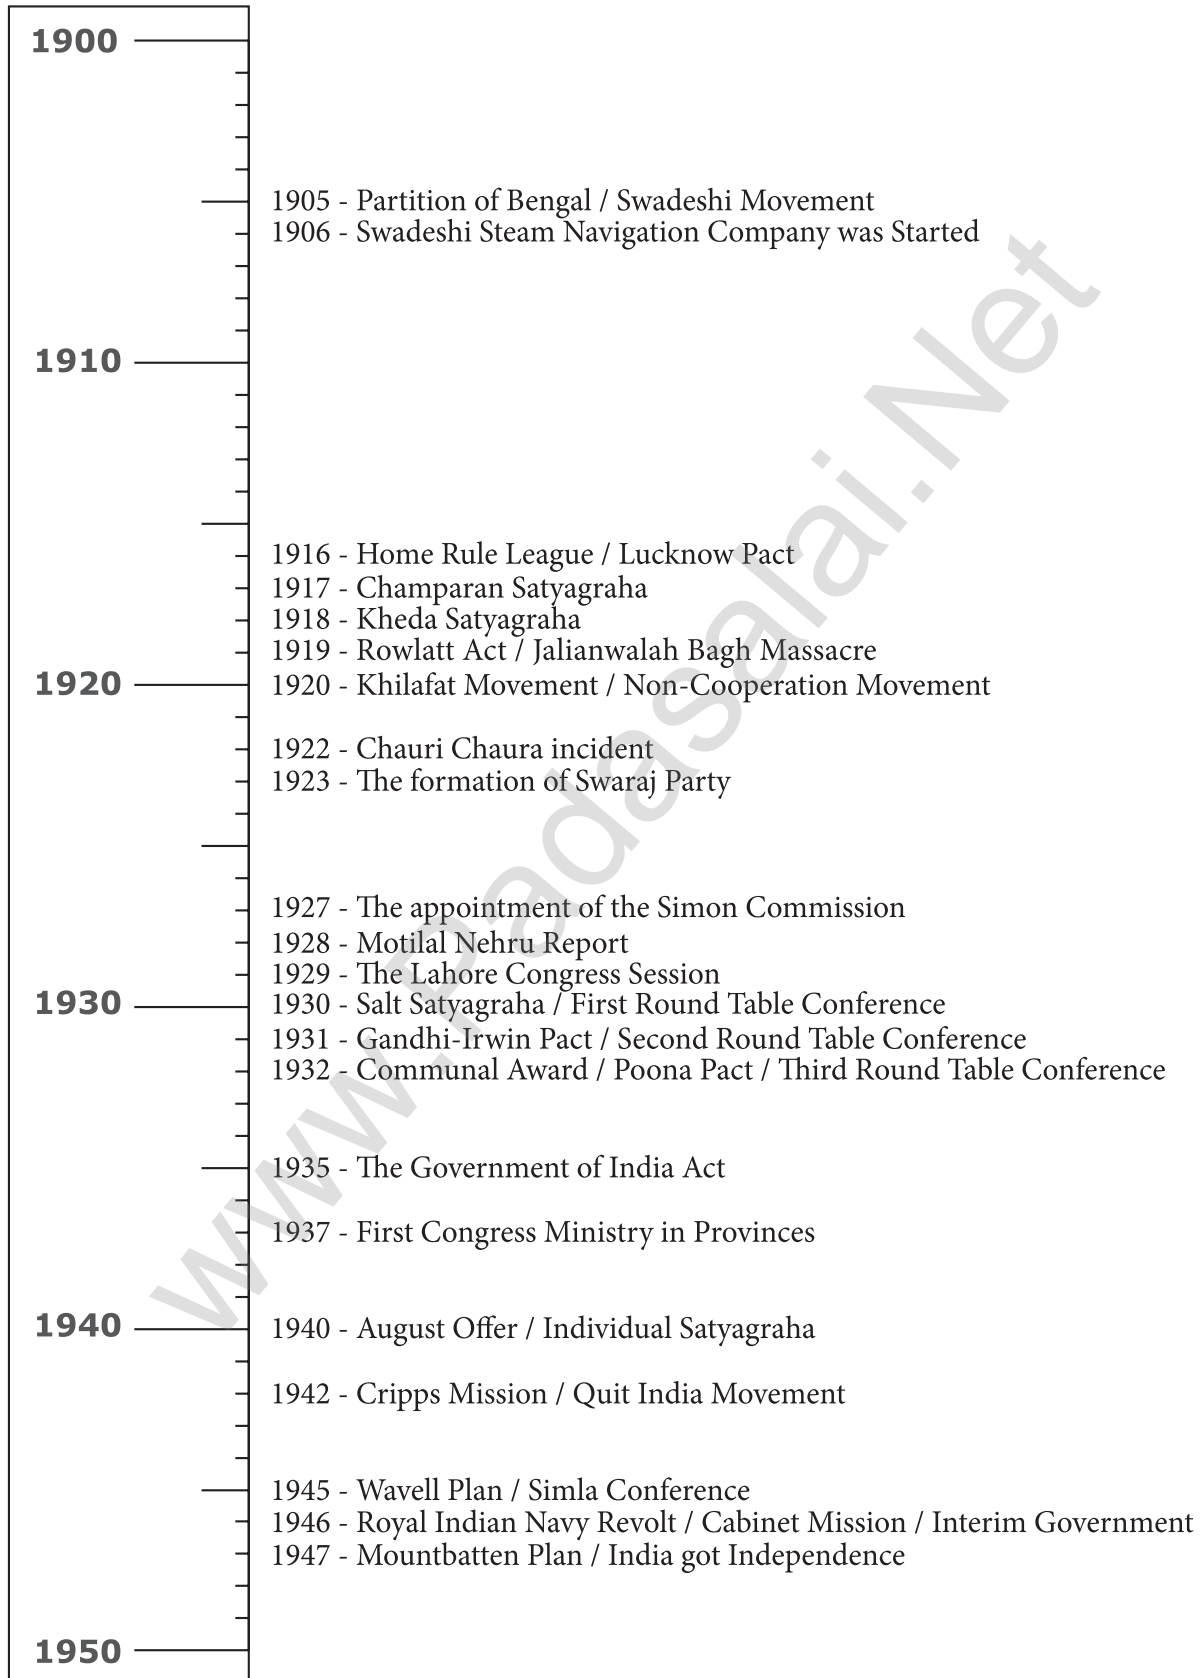

This was followed by a large scale **peasant revolt** led by the Communists. The killing of thousands of rebels was called "**White Terror**." Thousands of rebels were killed. After the White Terror, Ho Chi Minh left for Moscow and spent the 1930s in Moscow and China.

When France was defeated by Germany in 1940, Ho Chi Minh and his followers used this turn of events to advance the Vietnamese cause. Crossing over the border into Vietnam in January 1941, they organized the **League for the Independence of Vietnam**, or **Viet Minh**. This gave renewed emphasis to a distinct Vietnamese nationalism.

VII. Answer in a paragraph

1. Explain the peninsular plateaus.

(April-23)

The plateau region lies to the south of the Great Northern Plains. This is the largest physiographic division of our country. It covers an area of about 16 lakh sq.km (about half of the total area of the country).

It is an old rocky plateau region. It consists of a number of plateaus and hill ranges cut down with river valleys. Aravalli hills mark the north-western boundary of the plateau region. Its northern and north-eastern boundaries are marked by the Bundelkhand upland, Kaimur and Rajmahal hills. The Western Ghats and the Eastern Ghats mark the western and eastern boundaries respectively.

The height of the large portion of the plateau is more than 600 m from mean sea level. The peak of Anaimudi is the highest point in the plateau. Its height is 2,695m. It is located in Anaimalai. The general slope of this plateau is towards east. The Great Plateau is a part of the Gondwana (very ancient one) land mass. Due to the old age, the rivers in this region attained their base level and developed broad and shallow valleys.

The river Narmada divides the plateau region of India broadly into two parts. The region lying to the north of the Narmada is called the Central Highlands and the region lying to the south of Narmada is called the Deccan Plateau.

All the major rivers (Mahanadi, Godavari, Krishna, Kaveri etc.) lying to the south of the Vindhyas flow eastwards and join the Bay of Bengal. Narmada and Tapti are the two rivers situated to the south of the Vindhyas which flow westward. Their movement towards west is due to the presence of a rift valley in the region.

The coastal plain consists mainly of the recent alluvial deposits. It has a regular shoreline with well-defined beaches. The coastal plain between Mahanadi and Krishna river is known as the Northern Circars and the southern part lies between Krishna and Kaveri rivers is called Coromandal Coast.

The coastal plain between Mahanadi and Krishna river is known as the Northern Circars and the southern part lies between Krishna and Kaveri rivers is called Coromandal Coast.

Western Coastal Plains :

It lies between the Western Ghats and the Arabian Sea. It extends from Rann of kutch in the north to Kanyakumari in the south and its width varies from 10 to 80 km.

It is mainly characterised by sandy beaches, coastal sand dunes, mud flats, lagoons, estuary, laterite platforms and residual hills.

The northern part of the West Coastal Plain is known as Konkan Plain. The middle part of this plain is known as Kanara Coast. The southern part of the plain is known as Malabar coast which is about 550 km long and 20-100 km wide.

This part of the coast is made by sand dunes. Along the coast, there are numerous shallow lagoons and backwaters called Kayals and Teris. Vembanad is a famous back water lake found in this region.

 - ★ Temperature decreases at the rate of 6.5°C per 1000m ascent.

VIII. Answer in detail

1. **Write about South West Monsoon.** (Dept., PTA - 2, May-22, April-23)

South West Monsoon : (June to September)

The Southwest Monsoon is the most significant feature in Indian climate. Normally the Southwest monsoon sets in over the southern tip of the country in June.

It advances to the Konkan region and covers the entire country by 15th July. It is influenced by the global phenomenon like ELNINO.

Before its onset the temperature in North reaches upto 46°C. The sudden approach of Monsoon is called 'burst of monsoon'. The monsoon wind divides into two branches and blows from the Arabian Sea and the Bay of Bengal.

Arabian Sea Branch :

It gives heavy rainfall to the West Coast as it is located windwardside. The other part advances to North. It is obstructed by the Himalayas and the North gets heavy rain. As the Aravalli range is parallel to the wind direction, the North Eastern parts do not get rain.

Bay of Bengal Branch :

The wind from Bay of Bengal branch moves towards NorthEast India and Myanmar. This wind is trapped by a chain mountains Garo, Kashi etc. They bring heavy rain.

Later the winds travel towards west and become dry giving scanty rainfall. Overall about 75% of rainfall in India is received due to this monsoon.

2. **Describe the forests of India.** (PTA - 6, July-23)

Based on the climate, soil and landforms, the forests in India can be classified as follows :

Tropical Evergreen forests - Tropical Deciduous forests - Tropical Dry forests - Mountain forests - Alpine forests - Tidal forests.

Tropical Evergreen forests :

They are found in areas where the annual rainfall is above 200 cm. They cover - western ghats in Maharashtra and Karnataka, Kerala, Assam, West Bengal and Northeastern states. Rubber, Mahogany, ebony, rosewood, coconut, bamboo and palm trees are abundant.

Tropical Deciduous forests :

They are found in areas with annual rainfall of 100 - 200 cm, shed their leaves in summer. Sub - Himalayan range, Great plains, Central India and South India come under this. Sandalwood, rosewood, teak, sal, kusum, Mahua, Palas, Amla, Padauk and Bamboo trees grow here.

Tropical Dry forests :

These are found in areas with annual rainfall of 50 - 100 cm. East Rajasthan, Haryana, Punjab, Western Uttar Pradesh, Madhya Pradesh, Eastern Maharashtra, East TamilNadu come under this. Mahua, banyan, amaltas, palas, haldu, bamboo, babool and khair trees are found here.

Mountain forests :

Areas under moderate rainfall. Mountain slopes in N.E. States, Jammu and Kashmir, Himachal Pradesh and Uttarakhand come under this category. Sal, Oak, Laurel, Amra, Chestnut, Cinnamon are the main trees found.

Alpine forests :

All along the Himalayas with 2400m altitude. Coniferous trees, Oak, Silver, Fir, Pine, Juniper grow here.

Tidal forests :

Ganga - Brahmaputra, Godavary, Mahanadi, Krishna river deltas come under this. Also called Mangrove forests. Ganga - Brahmaputra delta has the largest tidal forest in the world. (Sunderban Delta)

VIII. Give detailed answer

1. **What are the factors affecting the climate of India and explain any two in detail ?**

(PTA - 5)

Climate of India is affected by the factors of latitude, altitude, distance from the seas, monsoon winds, relief features and jet streams.

i) Latitude

Latitudinally, India lies between 8°4'N and 37°6'N latitudes. The Tropic of Cancer divides the country into two equal halves. The area located to the south of Tropic of Cancer experiences high temperature and no severe cold season throughout the year whereas, the areas to the north of this latitude enjoy sub - tropical climate.

ii) Altitude (height)

When the altitude increases, The temperature decreases. Temperature decreases at the rate of 6.5°C for every 1000 metres of ascent. It is called "normal lapse rate". Hence, places in the mountains are cooler than the places on the plains.

Ooty and several other hill stations of south India and of the Himalayan ranges like Mussourie, Shimla etc., are much cooler than the places located on the Great Plains.

Introduction

LPG (i.e.) Liberalization, Privatisation and Globalization have become a much talked of subject among politicians, economists and businessmen in modern times. In India the period after 1980 - 81 was marked by severe balance of payment in crude oil prices and Gulf war in 1990 - 91 and the prevailing hostilities in West Asia.

When the new Government assumed power in June 1991,, India had unprecedented balance of payment crises. International agencies downgraded India's credit rating. Capital flew out of India in a large measure. The Government was forced to mortgage 40 tons of gold to the bank of England. Under large adverse circumstances the Government of India presented its budget in July 1991 with a series of policy changes which had underlined LPG. (Liberalisation, Privatization and Globalization)

This came to be called India's new economic policy. Many reforms were introduced to adopt globalization. Trends of liberalization in the 80s gave a substantial spurt in foreign. As a result of liberalised Foreign Investment Policy (FIP), there was a further spurt in foreign collaboration and Foreign Direct Investment. India became one of the founder members of GATT.
