The 21st century is a digital age, where any and every task is done on the internet. All thanks to the developments in technology which have been the main factor to ease human life on earth and maybe on other planets in future. But along with the benefits of technology, there are several harmful effects, one of them which has recently gained popularity: Cyber Crime. Cybercrime has emerged as pervasive and evolved as one of the most dangerous threats to humans. There are several users on the internet who indulge in illegal and criminal activities, using computers and networks. To guide you through this hot debate topic, below we have discussed essays on cybercrime. Cybercrime involves illegal activities like hacking, ransomware, cyberbullying,

online fraud, etc. People who are involved in cybercrime or any similar activities are called hackers, scammers or fraudsters. Cybercrime leads to financial loss for individuals who have fallen victim to one. Cybercrime often invades a person's privacy by stealing their personal details, including sensitive data, photos, and communication records, which can be used for blackmailing or any malicious purpose. There are several governmental and non-government organizations which are working to tackle cybercrime by raising awareness among the masses, cyber security training, implementing robust security protocols, and enacting comprehensive cybercrime laws.

47. a) **Read the following passage carefully and answer the questions that follow.**

The history of medicinal plants is as old as the history of human beings. Most medicines are obtained either directly or indirectly from plants. All the major systems of medicines such as Ayurveda, Yoga, Unani, Siddha and Homeopathy are based on drugs obtained from plants and animals. These drugs obtained from medicinal plants are called secondary metabolites. Plants produce primary metabolites for their own living e.g. carbohydrates, amino acids, etc., and secondary metabolites for protection, competition and species interaction, (e.g.) alkaloids, terpenoids, flavonoids etc. Phytochemistry is the study of Phyto chemicals which are chemical substances derived from various parts of the plant. Few plant derived drugs are Tulsi, Nannari, Nilavembu, Pappali etc.

Questions :

- (i) Name any two major systems of medicines. (ii) What are secondary metabolites?
