XII. Read the given passage and answer to the questions given below. (3)

The first steam engine to pull a passenger train was built nearly 200 years ago. It took two hours to travel 40 kms. The early steam trains burned coal to boil water and make steam. Trains have changed lot overtime. They use different sorts of power to help them travel fast and use less fuel. Some trains use diesel and some use electricity. Trains that use diesel have large heavy engines that use less fuel than other engines. In many cities, passenger trains run on electricity, some electric trains run underground through tunnels. One of the fastest trains in the world is called the bullet train. It is a Japanese electric train. It can travel at 300kms per hour.

Answer the questions.

- 46. Which is the fastest train in the world?
- 47. Which type of trains use diesel fuel?
- 48. In many cities, passenger trains run on _____.
