

1. Difference between Anabolism and Katabolism. 3
2. Living and Non Living characters of Viruses. 5
3. Life cycle of phage. 7
4. Viroid, Virusoid, Virusoids, Prions- 8
5. Viral disease in plants animals and humans (any 3). - 9
6. Need of classification. 10
7. Merits and demerits of Five kingdom of classification 11
8. Comparison of Five Kingdom of classification. - 13.
9. Gram staining method. - 17
10. Reproduction in bacteria (Binary fission, Endospore, - 20
 Sexual reproduction. - 1. Conjugation and Transformation.
11. Economic importance of Bacteria. 23
12. difference between Centrioplasm and chromoplasm 26
13. Mycoplasma, 27
14. Ray fungi - 28.
15. Coenocytic mycelium - 29,
16. difference between - Anamorph and Telomorph - 29.
17. A. Sexual Reproduction in Fungi - 30
18. Sexual Reproduction in Fungi - 30
19. Sac fungi - 33
20. Aflatoxin - 36.
21. importance of Mycorrhizae. - 37
22. Economic importance of Lichens - 39
23. write difference between Haplontic, Diplontic, and
 Haplodiplontic life cycle - 44
24. phycoerythrin - 46
25. Sexual Reproduction in Algae - 48
26. Non Vascular Cryptogams - amphibians of plant
 Kingdom - 51
27. Economic importance of Bryophytes - 52
28. write difference between homosporous and Heterosporous. 53

29. Prothallus. 55
- 30 Types of stele - 55
- 31 write difference between. Monoxyle and Pycnoxylin. 56
- 32 Gymnosperms resemble with Angiosperms. 57
- 33 difference between Gymnosperms and Angiosperms - 57
- 34 Economic importance of Gymnosperms. 58
- 35 Salient features of Angiosperms. - 59.
- 36 write difference between ~~by~~ Dicotyledons and Monocotyledons - 60
- 37 Liana, Caudex, 64
- 38 Annual, Biennial, Perennial, polycarpic, monocarpic, - 65
- 39 Characters of Root - 66
- 40 Regions of Root - 66
- 41 Primary function of Root. 67
- 42 Tap root modification - 68
- 43 Breathing roots, 68 - Epiphytic roots - 69.
- 44 Characters of stem - 70
- 45 Adventitious buds, (types) - 71
- 46 phylloclade, -73, cladode, -74
- 47 Functions of Leaf - 76.
- 48 modification of Leaf - Storage, phylloclade, Pitcher, Bladder - 83
- 49 Differentiate Dorsiventral and Isobilateral leaf.
50. difference between Racemose and cymose - 89
51. Classification of Racemose - 89
- 52 Classification of cymose - 92
- 53 special type of inflorescence - 94.
- 54 Monocious, diecious, polygamous - 96.
- 55 Actinomorphic, Zygomorphic, Asymmetrical - 97
- 56 Types of aestivation - 102. (with diagrams)
57. Monoadelphous. Diadelphous, polyadelphous, synergous, Episepalous, Epitepalous, - 104
- 58 difference between Apocarpous and syncarpous. - 107
59. Anthophore, Androphore, Gynophore, Gynandrophore - 109
- 60 Fleshy fruits - 114
- 61 Dry fruits - 115
- 62 Functions of Fruits - 118

- 63 Significance of Seeds. - 121
- 64 Binomial nomenclature - 129.
- 65 Taxonomic aids - 130,
- 66 Role of Botanical garden - 133
- 67 Uses of Herbarium - 135
- 68 Need for classification - 137
- 69 Monandry - 137
- 70 Three classes of Natural system - 138
- 71 Bentham and Hooker Classification (flowchart only) - 139
- 72 Aims of Chemotaxonomy, Aims of Biosystematics -
Serotaxonomy - 144
- 73 Significance of DNA Barcoding - 146.
- 74 Botanical description of Clitoria - 151
- 75 Botanical description of Datura metel - 155
- 76 Economic importance of Solanaceae - 157.
- 77 APEDA - 88
- 78 Parthenocarpic fruits - 114
- 79 core difference between Anamorph and telomorph - 188
- 80 Primary and Secondary magnification. - 169
- 81 Cell theory - 174, Cell principle (Doctrine) - 174
- 82 Types of cell's - 176.
- 83 core difference between Prokaryotic, mesokaryotic and
Eukaryotic - 177
- 84 difference between plant cell and animal cell. - 180
- 85 Functions of cell wall - 182.
- 86 phagocytosis, pinocytosis - 184
- 87 Function chloroplast, and types of plastids - 187.
- 88 Functions of nucleus - 192
- 89 types of chromosome based on position of centromere - 193
- 90 Special type of chromosome - 194 (polytene, Lamp brush)
- 91 Cell cycle time box - 203
- 92 Restriction point - 204
- 93 Karyokinesis and cytokinesis - 205
- 94 Drawbacks of Amitosis. - 206.
- 95 Significance of Mitosis. - 209
- 96 Synapsis, bivalent, - 210
- 97 Significance of Meiosis - 212

- 98 Difference between mitosis in plants and Animals - 213
- 99 Difference between mitosis and meiosis - 213
- 100 Mitogen, mitotic poisons, - 213
- 101 Properties of Water - 219
- 102 Morphin - 220
- 103 Properties of Enzyme - 232
- 104 Uses of enzyme - 238
- 105 nucleoside, nucleotide - 238
- 106 Types of RNA - 243

Vol - II

1. Characters of Meristem - 2
2. Classification of Meristem - 2
3. Shoot Apical theory, Root Apical theory - 3
4. parenchyma, Collenchyma, Sclerenchyma types - 6, 7
5. xylem (types of cells) phloem (types) - 10
6. difference between meristematic and permanent tissue - 14
7. difference between Collenchyma and Sclerenchyma - 15
8. difference between fibres and Sclereids - 15
9. difference between sieve cells and sieve tubes - 15
10. Function of Epidermal tissue system - 20
11. Radial, conjoint, Collateral, Bicollateral, open closed, Amphicribal, Amphivasal - 23
12. Box - 23
13. difference between Dicot root, Monocot root - 24
14. Eustele - 27
15. Starch Sheath - 27
16. Protoxylem lacuna, 29
17. write difference between Dicot stem and Monocot stem - 30
18. write difference between Root and stem - 30
19. guttation - 33
20. difference between intrafascicular and interfascicular cambium - 39
21. xylotomy - 40, porous and nonporous wood, difference - 41
22. Heart wood and sap wood difference - 44
23. dendrochronology. dendroclimatology - 44
24. Importance of studying growth rings - 44
25. write difference between Heart wood and Sapwood - 44
26. write difference between Spring wood and Autumn wood - 45
27. write difference between Diffuse porous and Ring porous wood - 46

- 28 Tyloses - 45
- 29 Haematoxylin, Canada balsam, 47
- 30 Write difference between Vascular cambium and Cork cambium - 50
- 31 Quinine - Cinnamon - 51.
- 32 Characters of diffusion - 59
- 33 Diffusion - 59
- 34 Significance of diffusion in plants - 60
- 35 Uniport / Symport / Antiport - 61
- 36 Inhibition with example - 63
- 37 Significance of inhibition - 63
- 38 Osmosis - Hypo, Hypo iso - 65
- 39 Thistle funnel experiment - 66
- 40 Types of Osmosis - 66.
41. Potato osmoscope - 67
- 42 Uses of reverse osmosis - 67
- 43 Apoplast and symplast concept - 68.
- 44 Difference between Active absorption and passive absorption - 71
- 45 Ascent of Sap - 71
- 46 Rate of transpiration in plants - 75
- 47 transpiration - 75
- 48 Starch-Sugar Interconversion theory - 76
49. Theory of K^+ transport - 77
- 50 Factors affecting Transpiration - 78
- 51 Uses of Antitranspirant - 80
52. Hydathodes - 80
- 53 Ringing or girdling experiment - 81
- 54 Münch Mass Flow hypothesis - 83
- 55 Mineral absorption theory - 84
- 56 deficiency disease and symptoms - 96 (Box)
- 57 Hydroponics and Aeroponics - 97
- 58 Bacteroid - 99
- 59 Nitrogen cycle - 99
- 60 Leghaemoglobin - 99
- 61 Special mode of Nutrition in plants - 102
(Saprophyte, Parasite, Symbiotic, Insectivorous)
- 62 Significance of photosynthesis - 110
- 63 Quantasomes - 110
- 64 Properties of Light - 115

- 65 difference between photosystem I and photosystem II
- 66 phosphorylation - types - definition - 122
- 67 cyclic and Non cyclic photophosphorylation cycle only - 122
- 68 Difference between cyclic and Non cyclic photophosphorylation - 124
- 69 Calvin cycle - 126
- 70 Difference between C₃ and C₄ plants - 129
- 71 C₂ Cycle - 131
- 72 photorespiration and dark respiration - 132
- 73 Significance of C₄ Cycle - 130
- " " CAM " - 131
- " " photorespiration - 132
- 74 Factors affecting photosynthesis - 134
- 75 photosynthesis in plants & Bacteria - 136
- 76 structure of ATP - 141
- 77 difference between Aerobic and Anaerobic respiration - 143
- 78 Glycolysis - flow chart - 144
- 79 Krebs cycle - flow chart - 147
- 80 Significance of Krebs cycle - 149
- 81 Draw a structure of F₁ particle - 147
- 82 Climacteric - 151
- 83 Respiratory Quotient (RQ)
- 84 Box - 152
- 85 difference between Glycolysis and fermentation - 156
- 86 Significance of pentose phosphate pathway - 160
- 87 physiological effects of Auxin - 173
- &
Agricultural role. Gibberellins - 174
- Cytokinin - 175
- Ethylene - 176
- Abscissic acid - 178
- 88 Apical dominance - 173
- 89 bolting - 174
- 90 Richmond Lang effect - 176
- 91 Programmed cell death (PCD) - 188
- 92 photoperiodism - 179 / Vernalization - 182

- 93 photoperiodology - 186
- 94 Senescence - 186
- 95 Stress hormone - 179.
- 96 climatic and Non climatic fruits - 178.
- 97 practical application of Vernalization - 183

Diagram Questions :-

1. Tobacco mosaic virus - TMV. - 5
2. T₄ Bacteriophage. - 5
3. Ultra structure of Bacteria - 15
4. Gram positive and Gram negative bacteria - 18
5. Endospore - 20
6. Perithecium and Apothecium - 33
7. Chlorella, Chlamydomonas, Isogamy. Anisogamy. Oogamy - 46, 47
8. Regions of Roots - 66
9. Types of Aestivation. - 103
10. Clitoria ternatea - 150.
11. Datura metel - 156
12. plant cell - 179
13. Mitochondria - 186.
14. Chloroplast - 188
15. Ribosome - 188
16. Structure of Chromosome - 193
17. Cell Cycle - 204
18. Enzyme mechanism - 233

Vol - II

1. Meristem - 2
2. Histogen theory, shoot tunica corpus theory - 3
3. Structure of stomata - 18
4. T.S of Nerium Leaf - 19
5. Open, conjoint, Bicollateral, Concentric, radial - 22
6. Dicot root, Monocot root, Monocot stem, Dicot Leaf Monocot Leaf.
7. Tylus - 46
8. Structure of Lenticell's. - 51
9. Structure of Hydathode - 80
10. Stages in growth rate - 165 (sigmoid curve)
